Free Speech, The People, The Police Protections, And A Free State

The People, being Free, have a right to be protected by a Police Department, that protects rights, that works also with the '30%' Community-Social-Justice groups, and that enforces the Law. The People have a right to a Free State. [To be refined.] Each political Party is to be protected by the others, and by the state (States and Federal Government). Free Speech – the very Freedom that comes from formulating thoughts, expressing them in print or speech or gesture, that also protects or indicates such right and Freedom of others, is to be protected, by the state (States and Federal Government). Various speech will be this or that; and should protect fundamental rights to reason, standpoint, debate, privacy, levels and realization of depth, and appeal to fact, reason, the subjective, and one's own formulation.
